

Cup Warmer Glass

Glass Cup Warmer

With its simple, clean lines, the stainless steel cup warmer featuring high-quality clear glass elements cuts an elegant figure alongside all GIGA Professional models. Thanks to its three storage surfaces, it provides plenty of space for a total of 100 espresso cups (diam. 60 mm) or 60 coffee cups (diam. 80 mm). The three modern heating panels are energy-efficient and run silently, which makes the product ideal for use in offices.

Power	75 W
Weight approx.	15 kg
Cable length	approx. 2 m

High-quality materials

JURA insists on using nothing but the highest quality materials for this cup warmer. It is made from brushed stainless steel and clear glass elements.

High capacity

The Glass Cup Warmer features three storage surfaces, so there is enough space for 60 coffee cups or 100 espresso cups. This makes it ideal for locations where people drink a lot of coffee.

Not only does the Glass Cup Warmer offer all the functions you could wish for, it will also bowl you over with its elegant yet understated design. The three modern heating elements, which are integrated into the storage surfaces, are energy-efficient and run silently. This means that the Glass Cup Warmer is just as much at home in offices or conference rooms as it is in locations such as bars, bistros and coffee lounges.
