

Technical Data WMF presto!	
Recommended daily / max. hourly output*	up to 150 cups
1 or 2 coffee bean hoppers	each approx. 500 g, optionally each approx. 1000 g (large central coffee bean hopper not possible)
Choc- oder topping powder hopper	each approx. 500 g
Twin topping powder hopper (choc- and topping powder)	each approx. 500 g
Rated power	1/N/PE - 50 Hz/230 V
External dimensions (width/height/depth)	326 mm / 676 mm (incl. bean hopper) / 556 mm
Empty weight	approx. 30 - 40 kg
Continuous sound pressure level (Lpa)**	<70 dB (A)

* Depending on cup sizes and quality settings.
 ** The A-rated sound pressure level Lpa (slow) and Lpa (pulsed) at the operator's workplace is below 70 dB (A) in every operating mode.
 Technical data subject to change. Errors and omissions anywhere in this leaflet reserved.

WMF presto!

features

WMF presto! ... welcome world of coffee

Award-winning product design

No sooner did it appear on the market than the WMF presto! won an award in one of the world's major design competitions, the »reddot design award«. The »winner 2005« label ranks it with the best in design and business. The NRW Design Centre will vouch for the quality of that label.

Self-explanatory display
 The display guides you through the machine, step by step. It also shows all the operating sequences as well as useful information.

The »Barista pad«
 The next brew can be made stronger or weaker as the client desires by means of this pad on the Touch-Screen-Display.

Hot rinse option
 Press this pad to preheat all the parts in contact with the coffee. Hot Espresso, right from the very first cup.

Topping, Twinchoc or Twin topping
 These easy to handle topping versions are primarily designed for office use. The twin topping version even allows mixed drinks to be prepared with coffee, milk topping powder AND choc.

Milk compartment
 Milk packs are not particularly attractive to look at. A special compartment (for 1-1.5 l) keeps them neatly out of sight.

Hot chocolate with milk appeal. Almost any creation involving milk, coffee, water and chocolate can be produced with lots of fresh milk.

The intelligent WMF presto!
 Alter the quantity of ground coffee and all the other settings will be adjusted automatically. For consistently good coffee.

Perfect coffee specialties
 From Espresso to Chociatto, the WMF presto! does everything simply at the touch of a button and all in perfect quality.

Manual insert
 A manual insert allows a second type of ground coffee to be used, even in the value-for-money Economy Class (not possible with three product hoppers).

3 basic models, with versions
 The WMF presto! is available in three basic models. Each model can be customer optimised with the addition of numerous options - simply quality Made in Germany.

Technical insert presto!
 For all locations where no constant water supply is available or the internal water tank is not sufficient.

Milk low-level warning
 New: Low-level warning of the external milk cooler is shown on the display of the coffee machine (not for all coolers of the WMF range possible).

Plug+Clean
 The patented, optionally available Plug+Clean milk cleaning system effortlessly cleans all parts in contact with milk.

Top for cost-effectiveness
 Unique cost-effectiveness in this sector makes this the perfect choice for the price-conscious.

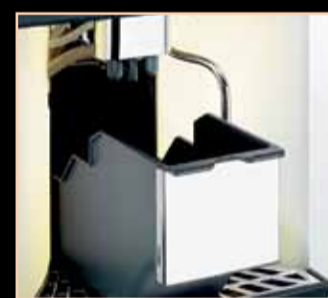

Slim build
 A WMF presto! is only a little bit wider than the long side of an A4 page. So there's room for two even on the smallest counter.

Great design
 Elegant by day and a shining example of attractive design ideas by night.

Height-adjustable combi spout
 The spout is easily adjustable to enable pots from 70 - 180 mm tall to be filled (190 mm on models without a chocolate or topping hopper).

Large coffee grounds container
 The large capacity coffee grounds container is centrally positioned for easy access.

Clever key allocation
 Key labelling is as brilliantly simple as product allocation. Simply slip in the ready-made labels.

Flexible water supply
 Depending on request - the WMF presto! can be equipped with water tank, constant water supply or with aqua-flex system (both options combined in ONE unit).

Easy maintenance
 You can do the basic maintenance yourself. That means fewer visits from the WMF Service Engineer.

Filter cartridge
 A filter cartridge in the water tank or a WMF in-line water filter extends maintenance intervals, enhances the taste and prolongs the life of your machine.

Automatic cleaning
 and descaling at the touch of a button. That saves time and cuts operating costs.

Well thought-out hopper
 The hoppers can be closed before removal, to make cleaning and refilling very much easier.

Mobile coffee enjoyment
 A mobile station makes the WMF presto! even more flexible. You can take your machine almost anywhere with you. All you need is a socket.

Auxiliary Units
 The cup rack, the Cup Et Cool or the vending units turn the WMF presto! into a team player, even in self-service mode.

Our own service fleet
 More than 270 engineers ensure that you can always rely on your WMF presto!

Environmentally friendly thanks to »Green WMF«
 Reduced energy consumption, fewer chemicals and nearly complete recycling are just a few points of the sustainable WMF concept.
