J6 from JURA

360° pleasure for all the senses

Top marks across the board thanks to P.E.P.® and fine foam technology

A number of top innovations ensure that both classics and trend specialities can be created with breathtaking quality: The AromaG3 grinder is now twice as fast, yet preserves all the delicious aroma of the coffee beans. The Pulse Extraction Process (P.E.P.®) ensures the optimum extraction time for a short speciality and delivers a taste explosion for the ristretto and espresso. Trend specialities finished with milk and milk foam are brought to perfection thanks to fine foam technology. Gourmets agree and award the J6 top marks for its aroma.

Self-explanatory operation – even by app on request

A logical structure and easy-to-understand graphics make the modern operating concept absolutely self-explanatory. The TFT display and the Rotary Selection take users straight to what they want. If they so wish, they can also control the J6 via smartphone using the JURA app.* Thanks to RFID technology, the Intelligent Water System (I.W.S.®) detects the water filter automatically. A customized inlay in the storage compartment allows an interchangeable milk spout and a milk pipe to be stowed away to save space. Both are within easy reach at all times. A separate hot-water spout, the container for milk system cleaning and the integrated maintenance programmes ensure TÜV-certified hygiene at the touch of a button.

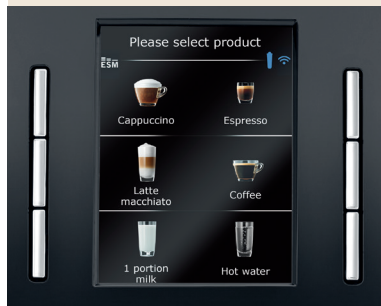

360° pleasure

Awarded a whole host of prestigious international design prizes, the J line from JURA impresses at first sight thanks to its clear, simple and symmetrical lines. In the latest version from this highly successful line, the Rotary Switch with its Blue Crystal design, glass cup grille and chrome-plated coffee spout knowingly accentuate the harmonious all-round design. In the J6, ten years of experience are combined with state-of-the-art technology. The result is an automatic coffee machine offering pleasure for all the senses: with a range of specialities of an intoxicating aroma quality, self-explanatory operation, perfect, TÜV-certified hygiene as well as exceptional design and high-quality materials processed to Swiss standards of precision.

* The separately available Smart Connect Bluetooth® transmitter / receiver is necessary for this.
